

Aerial™ Consumer Care®

What if you could improve outcomes through action plans, surveys and health tutorials?

Achieve better outcomes, reduce costs and improve care delivery by more effectively engaging consumers in their health and care.

- Enable self-assessment and improve outcomes through goal setting.
- Arm individuals with the information and education they need to be successful.
- Improve outcomes with earlier intervention.
- Connect individuals with care managers and care coordinators.
- Enhance care collaboration with one common view.
- Help measure engagement and program effectiveness.

Empower consumers with the information they need to make informed choices about their own healthcare.

Automatically queue high-risk patients for program enrollment based on their self-assessment.

Member self-assessment data is available to care managers immediately.

Engaging and Educating

Consumer Care® delivers a powerful suite of integrated, near-real-time, consumer-centric applications that enable plans and providers to connect to their members, patients and consumers easily and quickly. Meeting consumers where and when they want to engage, this suite creates valuable virtual interactions that make it simple for consumers to manage their own care.

- Surveys enable individuals to self-assess on disease-specific questions and empower care managers to identify immediate needs and follow up with targeted actions.
- Action Plans auto-generate suggested goals and actions based on how an individual self-assesses.
- Health tutorials, sourced from Emmi Solutions, provide health education programs based on survey responses.
- Care managers gain critical visibility to individuals' Action Plans, Surveys and Health Tutorial activity through views integrated with workflows in Aerial Health Summary and Complex Care Management

Aerial™ Consumer Care is an on-demand, consumer-facing portal that engages individuals in targeted health improvement activities.
