

# Aerial™ Financial Performance Dashboards

What if you could **visualize actionable intelligence to manage costs and improve outcomes?**

Medecision promotes fast, informed decision making with Aerial™ Financial Performance Dashboards. Available in three packages, each offers a unique view into a provider's data and presents vital, actionable tracking and measurement metrics in easy to understand visualizations:

- **Utilization** – analyzes and displays performance against program metrics and enables easy review of emergency department and imaging utilization in and out of network.
- **Prescribing and Dispensing** – tracks and displays prescribing patterns (e.g., generics, high-cost drugs) and medication adherence.
- **Comorbidity Stratification** – enables clinical teams to identify, target and act on members with common chronic comorbidity clusters (e.g., diabetes, hypertension and cardiac disease).

Rapidly visualize financial performance for targeted at-risk populations, panels and individuals.

Drill deep and review longitudinal claims per patient to physicians with highest OON utilization.

Easily recognize generic dispensing rates and prescription patterns to identify brand-to-generic substitution opportunities or cost containment opportunities.

## With Aerial Financial Performance Dashboards your organization can accomplish the following:

- Gain a comprehensive, timely view of performance metrics while simultaneously monitoring the impact of clinical interventions on cost of care.
- Guide appropriate, quality care and drive financial performance for targeted at-risk populations, panels and individuals.
- Gain quick insight into prescribing patterns to optimize medication utilization while driving appropriate use and adherence to care plans.
- Maintain network strength with actionable intelligence into in-network utilization and care quality.

A component of Medecision's state-of-the-art Aerial Population Health Management solution, Financial Performance Dashboards provides the insight needed to identify and target meaningful opportunities for cost reduction and quality improvement.

**Aerial Financial Performance Dashboards provide management and clinical teams with the actionable intelligence they need to make rapid and critical decisions.**
